Investment Pricing

Monthly Cost: \$5,000

3 custom operating systems with unlimited tools, 24/7 agent operations, Mission Control command center, and full agent infrastructure

Cost Category	Amount	Details
One-Time Setup (3 machines)	\$7,500	Provisioning, agent configuration, onboarding
Monthly All-In	\$5,000	3 OS + agents + unlimited tools + support
Year 1 Total	\$67,500	Setup + 12 months operations

Three Custom Operating Systems with Hermes Agent Command Centers

Each OS runs 24/7 with Hermes as the lead reasoning agent, coordinating multiple specialized agents through Mission Control command center.

Operating System 1: AfricaBiz Operations Hub

Focus: Pharmaceutical distribution, customer relationships, daily operations

Agent Architecture: 5-10 agents with sub-machines, coordinated 24/7 through Mission Control

- ✓ Salesforce CRM (enterprise agents managing pipeline)
- ✓ Email & communication (agent-powered responses)
- ✓ Unlimited Google Sheets & real-time analytics
- ✓ Automated reporting & compliance

Operating System 2: Global Markets Infrastructure

Focus: International expansion, supply chain, distribution partners

Agent Architecture: Full team managing supply chain 24/7 with real-time coordination

- ✓ Warehouse management (agents optimizing inventory)
- ✓ Google Maps API unlimited (agents routing shipments)
- ✓ Real-time tracking & automated alerts
- ✓ Supply chain optimization & forecasting

Operating System 3: Agentic Rise & Women's AI Union

Focus: AI research, women's entrepreneurship, international business

Agent Architecture: Research agents, community agents, business development agents working in parallel

- ✓ Notion knowledge base (agents documenting research)
- ✓ Google Workspace (agents coordinating global teams)
- ✓ GitHub API (agents managing code & projects)
- ✓ Telegram community management (agents responding to community)

Mission Control: The Command Center

Hermes + Mission Control = Your AI Army with Oversight

Hermes is the reasoning engine. Mission Control is the command center. Together they:

- ✓ **Eisenhower Matrix:** Automatically prioritizes tasks by importance/urgency
- ✓ **Agent Orchestration:** Hermes coordinates Status Agents, Field Ops Agents, Research Agents, and Workflow Agents

- ✓ **Real-Time Dashboard:** See all agent work, pending decisions, and cost tracking in one place
- ✓ **Inbox Communication:** Agents report progress, ask for approval, escalate decisions
- ✓ **Approval Workflows:** You decide what matters—agents execute everything else (with your OK)
- ✓ **24/7 Autonomous Daemon:** Agents work around the clock, spawn new tasks automatically
- ✓ **Cost & Token Tracking:** See exactly what each agent spent and why

Design System: StudEx Platform

A cohesive design system that reflects the StudEx ecosystem across all platforms: AfricaBiz, Global Markets, Agentic Rise, Eve AI Workforce, and Silicon Valley HQ.

Color Palette

Primary

Brand Teal: #059669

Trust, growth, ecosystem identity

Secondary

Deep Blue: #1e40af

Technical, innovative, complementary accent

Accent

Gold/Amber: #f59e0b

Highlights, premium features, CTAs

Success

Green: #10b981

Completed tasks, operational status

Warning

Amber: #f59e0b

Alerts, pending review

Error

Red: #ef4444

Failures, critical issues

Typography Scale

Level	Size	Weight	Use Case
Display	3rem (48px)	700	Hero headlines
Heading 1	2.25rem (36px)	700	Page titles
Heading 2	1.875rem (30px)	600	Section headers
Heading 3	1.5rem (24px)	600	Subsection headers
Body	1rem (16px)	400	Default body text
Small	0.875rem (14px)	400	Captions, secondary text

Component Library

Production-ready components with JSX + Tailwind CSS, responsive design, accessibility (WCAG AA), and light/dark mode support:

- ✓ Buttons (primary, secondary, sizes, states)
- ✓ Cards (surface, shadow, hover effects)
- ✓ Forms (inputs, labels, validation, focus states)
- ✓ Navigation (desktop & mobile hamburger)
- ✓ Modals (overlay, backdrop, sizing)
- ✓ Metric Cards (for dashboard data display)
- ✓ Status Indicators (operational status)
- ✓ Timeline (task history)
- ✓ Data Tables (responsive with pagination)
- ✓ Headers & Sidebars (navigation structure)

Responsive Design

Breakpoint	Range	Usage
Mobile	< 640px	Single column, hamburger menu, touch-friendly
Tablet	640px - 1024px	Two column, adaptive navigation
Desktop	> 1024px	

Full layout, sidebar navigation,
multi-column

Accessibility (WCAG AA)

- ✓ Color contrast: 4.5:1 for normal text, 3:1 for large text
- ✓ Focus indicators: Visible on all interactive elements
- ✓ Touch targets: Minimum 44x44px
- ✓ Keyboard navigation: Full accessibility without mouse
- ✓ Semantic HTML: Proper heading hierarchy and landmarks
- ✓ Screen reader support: ARIA labels and descriptions
- ✓ Text sizing: Support 200% zoom without horizontal scroll

Agent Workflows: Daily Operations

Each virtual machine runs 24/7 with specialized agents coordinated through Hermes reasoning engine and Mission Control command center.

Agent Types & Roles

Status Agents

Monitor operational health, report metrics, track progress on tasks

- ✓ Real-time metrics collection
- ✓ Health checks (24/7)
- ✓ Progress reporting
- ✓ Dashboard updates

Field Ops Agents

Execute customer-facing work, handle transactions, manage relationships

- ✓ Customer communication
- ✓ Order processing
- ✓ Deal management
- ✓ Transaction handling

Research Agents

Market analysis, strategic planning, data synthesis, insights generation

- ✓ Market research
- ✓ Competitor analysis
- ✓ Data synthesis
- ✓ Strategic recommendations

Workflow Agents

Automate processes, coordinate systems, manage integrations

- ✓ Process automation
- ✓ System integration
- ✓ Data synchronization
- ✓ Cross-system coordination

Daily Agent Workflow: AfricaBiz Operations Hub

6:00 AM - Morning Status Report

- Status Agent checks overnight performance
- Collects metrics: orders processed, revenue, issues
- Generates morning brief for Natalia
- Escalates critical issues to Mission Control inbox

8:00 AM - Customer Operations Begin

- Field Ops Agent handles incoming customer inquiries (Salesforce/Email)
- Workflow Agent syncs customer data from CRM to Google Sheets
- Research Agent analyzes customer trends from last 24 hours
- Status Agent tracks real-time progress and team capacity

12:00 PM - Midday Review

- Status Agent provides midday metrics to dashboard
- Mission Control alerts if any KPIs fall below targets
- Hermes reasons about resource allocation adjustments
- Field Ops Agent adjusts workload based on Hermes recommendations

3:00 PM - Compliance & Reporting

- Workflow Agent generates compliance reports

- Research Agent analyzes daily performance trends
- Hermes generates strategic insights and recommendations
- Status Agent prepares afternoon summary report

6:00 PM - End of Day

- All agents compile end-of-day reports
- Workflow Agent syncs all data to archive
- Mission Control creates executive summary
- Agents shift to background monitoring (24/7 mode)

24/7 Continuous Operation

- Status agents monitor for critical issues
- Automated responses to time-sensitive customer inquiries
- Research agents process batch data overnight
- Workflow agents maintain system health and synchronization

Agent Cost Tracking (Mission Control)

Each agent's work is tracked in real-time:

- ✓ Tokens used per task
- ✓ Time spent on operations
- ✓ Cost per agent per day
- ✓ ROI on agent execution (value generated vs. cost)

- ✓ Optimization recommendations

Automation Infrastructure: Pipedream + Composio

Pipedream Workflow Templates

Pre-built automation workflows for your three operating systems:

Daily Operations Report

Scheduled daily summary combining metrics from all systems

- ✓ Aggregates agent activity
- ✓ Compiles customer metrics
- ✓ Generates Slack notification
- ✓ Sends email to leadership

Deal Alert System

Real-time alerts when high-value deals enter pipeline

- ✓ Monitors Salesforce

- ✓ Triggers on deal thresholds

- ✓ Notifies team instantly

- ✓ Logs to analytics

Agent Performance Metrics

Continuous tracking of agent efficiency and outputs

- ✓ Collects agent logs

- ✓ Calculates efficiency ratios

- ✓ Updates dashboard

- ✓ Alerts on anomalies

Salesforce Sync

Two-way synchronization between CRM and operational systems

- ✓ Syncs customer data

- ✓ Updates deal status

- ✓ Logs all activities

- ✓ Triggers agent actions

Discord/Slack Integration

Real-time team notifications and command execution

- ✓ Sends alerts to channels
- ✓ Executes commands
- ✓ Logs conversations
- ✓ Creates tickets

Cost Tracking Pipeline

Automatic tracking of all agent and tool spending

- ✓ Collects billing data
- ✓ Calculates ROI
- ✓ Generates reports
- ✓ Alerts on overages

Composio Integration: 1000+ App Connections

Enable agents to connect directly to any business tool:

Supported Integrations:

- ✓ **CRM:** Salesforce, HubSpot, Pipedrive
- ✓ **Communication:** Gmail, Slack, Teams, Telegram
- ✓ **Productivity:** Google Workspace, Microsoft 365, Notion
- ✓ **Analytics:** Google Analytics, Mixpanel, Segment
- ✓ **Finance:** Stripe, PayPal, Wave
- ✓ **Development:** GitHub, GitLab, Jira
- ✓ **Commerce:** Shopify, WooCommerce, Magento
- ✓ **Warehouse:** Warehouse management systems
- ✓ **Social:** Twitter, Facebook, LinkedIn, TikTok
- ✓ **1000+** additional integrations available

How It Works Together

Daily Agent Workflow with Pipedream + Composio

- Agent executes task → Composio connects to Salesforce/ Gmail/Slack
- Data flows in real-time through Pipedream pipelines
- Pipedream triggers automated workflows (reports, alerts, syncs)
- Mission Control monitors all integrations and agent activities

- Hermes reasoning engine makes optimization decisions
- Results sent back to agents, teams, and dashboards

Ecosystem Companies & Leadership

Sister Companies

Silicon Valley HQ

siliconvalleyhq.com

Global headquarters for AI startup development. Manages 500+ founder network, investor relationships, and co-investment opportunities.

Eve AI Workforce

eveaiworkforce.com (Live August 2026)

Specialized AI workforce platform. Supports all three OS with dedicated agent infrastructure and distributed talent management.

StudEx Wildlife

10-Year Silicon Valley Legacy

Innovation accelerator housing Agentic Rise of Global Startups, mentorship networks, and Innovation Arcade collaboration hub.

Leadership Team

Natalia

International Business Architect & COO

Leads international operations, women's AI union development, and strategic partnerships. Oversees execution of all three virtual machines. Russia operations Aug 20-27.

Chris Peralta

Co-Founder: StudEx Wildlife & Agentic Rise

10-year Silicon Valley veteran. Monday/Friday mentoring on Agentic Rise, coaching recruitment, Innovation Arcade collaboration, global startup ecosystem development.

Finance & Partnerships

t.ramaphosa@studex.dev

Manages partnership agreements, financial terms, government contracts, and executive-level coordination.

Complete Year 1 Summary

Setup Investment

\$7,500 (one-time)

Monthly Operating Cost

\$5,000 (all-in)

Year 1 Investment

\$67,500 (setup + 12 months)

Market Value

\$360,000+ (3 machines @ \$10K each)

Your \$5,000/Month Investment Includes:

- ✓ 3 custom operating systems (AfricaBiz, Global Markets, Agentic Rise)
- ✓ Full agent teams (15-30 agents) with sub-machines per OS
- ✓ 24/7 agent operations coordinated through Mission Control
- ✓ Hermes reasoning engine as lead agent
- ✓ 60+ tools unlimited (Salesforce, Gmail, Slack, Sheets, Notion, GitHub, etc.)
- ✓ Unlimited API calls & enterprise scaling
- ✓ Pipedream automation workflows (5+ templates)
- ✓ Composio integration (1000+ apps available)
- ✓ Professional design system (responsive, accessible, themeable)
- ✓ 24/7 technical support & agent management
- ✓ Natalia's full-time operations leadership
- ✓ Access to 500+ AI founder community (Silicon Valley HQ)
- ✓ Agentic Rise mentorship program (Chris Peralta, Mon/Fri)
- ✓ Manufacturing hub co-investment opportunities
- ✓ Government partnership facilitation

Implementation Timeline

Phase	Timeline	Deliverables
Phase 1: Foundation	Week 1-2	Setup 3 OS, configure agents, deploy Mission Control
Phase 2: Integration	Week 3-4	Connect tools (Salesforce, Gmail, Slack, Sheets), setup Pipedream
Phase 3: Agent Training	Week 5-6	Train agents on workflows, setup automation, enable Composio
Phase 4: Optimization	Week 7-8	Fine-tune agent behavior, optimize costs, dashboard training
Phase 5: Launch	Week 9	Go live, 24/7 operations begin, continuous monitoring

Monthly Metrics Tracked

- ✓ **Agent Performance:** Tasks completed, success rate, cost per task
- ✓ **Operational Efficiency:** Turnaround time, customer satisfaction, revenue
- ✓ **System Health:** Uptime, integration status, error rates
- ✓ **ROI Analysis:** Value generated vs. platform cost
- ✓ **Team Capacity:** Agent utilization, workload distribution

- ✓ **Compliance:** Regulatory adherence, audit trails
